

Wildlife Tracking Skills Workshop

Treehaven Field Station, Tomahawk, WI

December 9-10 2006

*As part of its educational programming, the **Timber Wolf Alliance (TWA)** offers workshops and training to their members and to the general public. The workshop's goal is to offer quality tracking skill training to all enthusiasts who wish not only to understand wildlife tracking, but also to learn about large carnivores. This two-day workshop will cover track and sign identification, understanding footprints, and interpreting gait, with an emphasis on reading trails to understand animal behavior and ecology. The workshop includes classroom lectures and in-the-field training.*

Workshop registration fee:

\$190 - 1 night lodging (TWA supporter \$175)

\$210 - 2 nights lodging (TWA supporter \$195)

The workshop fee includes training, meals, lodging, and workshop materials.

Registration deadline is November 27, 2006

This two-day workshop begins at 8:00 AM on December 9 and ends at 4:00 PM on December 10.

A complete agenda will be sent after payment is received.

Registration is limited to 40 people and is on a first-come, first-served basis.

Due to the popularity of this workshop, we would like to hear of any cancellations as soon as possible so that people on our waiting list can be given ample time to make plans.

The registration fee is refundable less a \$20 processing fee up to November 27.

For more information contact Timber Wolf Alliance at: (715) 682-1490 or tw@northland.edu.

Wildlife Tracking Skills Workshop

featuring

James C. Halfpenny, Ph.D.

December 9-10, 2006

Treehaven Field Station, Tomahawk, WI

James Halfpenny, Ph.D. is one of the world's foremost professional wildlife trackers and a widely renowned scientist and educator. Halfpenny is the founder of **A Naturalist's World**, and educational tracking adventure company, and is a former research associate at the Institute of Arctic and Alpine Research at the University of Colorado. He was an instructor at the National Outdoor Leadership School and served as director of the Mountain Research Station. He has taught tracking since 1967. In addition to numerous scientific and popular articles, he is author of *A Field Guide to Mammal Tracking in North America* and *Winter: An Ecological Handbook*.

Take advantage of the opportunity to learn a skill that can be used time and time again!

Timber Wolf Alliance recognizes the wolf as an apex predator that is essential to the biological diversity of the northern forest. The mission of Timber Wolf Alliance is to use public education to promote and assist in achieving a sustainable population of timber wolves in the Great Lakes region, with special emphasis in the Lake Superior basin. Timber Wolf Alliance programs promote strategies that enhance wolf populations and stable inter-relationships within the natural community. Timber Wolf Alliance is proud to be an active sponsor of wolf recovery and management efforts in our region since 1987. Timber Wolf Alliance is a program of the Sigurd Olson Environmental Institute.

Sigurd Olson Environmental Institute

Since its founding in 1972, the Sigurd Olson Environmental Institute of Northland College has worked with citizens to build environmental awareness, encourage responsible action, and forge lasting solutions to environmental challenges in the Lake Superior region. The Institute promotes protection and restoration of natural systems and processes; works with citizens to develop sustainable communities that are socially and environmentally healthy and interprets, preserves and promotes the legacy of Sigurd F. Olson and infuses his environmental, liberal arts educational approach in all Institute programs.

The Institute's namesake, Sigurd F. Olson (1899 - 1982), is one of America's most beloved nature writers and most influential conservationists of the 20th century. Best known as the author of nine books about the North Country, Olson also helped shape national conservation policy and played an important role in the preservation of many national parks, seashores and wilderness areas. He was an early wolf researcher with his pioneering 1920s study on timber wolves and coyotes of the Superior National Forest in northeastern Minnesota. The Institute strives to preserve Olson's legacy and carry on his work, helping protect the unique character of the north woods through the dissemination of environmental and social knowledge. To obtain more information about the Institute, call (715) 682-1223 or visit our website at www.northland.edu/soei.
